

Federal Communications Commission
445 12th Street, SW
Washington, D.C. 20554
In the Matter of the Creation of a Low Power FM Service
MM Docket No. 99-25

September 13, 2011

Dear Commissioners:

The 1,675 letters included here in four separate attachments were collected through an e-action website administered by the Media and Democracy Coalition to enable public participation in the low power radio proceeding.

The letters, which are addressed from constituents to their elected officials in Congress as well as to the Federal Communications Commission, ask that channels be reserved for low power community radio in the home districts of their authors.

Sincerely,

Brandy Doyle
Policy Director
Prometheus Radio Project
(a member organization of the Media and Democracy Coalition)
P.O. Box 42158
Philadelphia, PA
(215) 727-9620 x518

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,
Brian Suihkonen

Honorable Congress person and FCC Commissioners,

My husband and I believe in the immense importance of local radio. The content on the radio dials across America must be protected and we have to take action to secure enough stations to serve listeners with community voices and content. We feel so strongly about this issue that we even volunteer at a local community radio station.

We are sending you our feelings and hope you'll read the message below which explains what we hope you'll do to ensure we save channels for community radio!

rhinelander, WI 54501

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Oliver Trager
56 Windsor Place
Brooklyn, NY 1121

As a community member who has incorporated radio and recording projects into my work as a non-profit professional, I see the immense value in providing communities with voices that do not typically have them. Please, let's keep voices on the radio diverse and representative of our communities, rather than allowing for uniform programming that doesn't meet the unique needs of our communities.

Sincerely,

Rebecca Fogel

In my own community, too me it's very clear that certain voices are not necessarily part of the conversation. Most regularly, I would note the way immigrant workers are silenced, most extremely the inmates of San Quentin. These groups as well as many others (youths, disabled folks, people of color) who are not always considered would be able to voice their concerns much more strongly if we had a more accessible media center. This would simply be impossible if potential local stations are forced to bow down to established unaccessible big stations.

Sincerely,

Natty Pilcher
117 Laurel Grove Avenue
Ross, CA 94957

Honorable Congress person and FCC Commissioners,

I'm an Oklahoma City Funeral Director. I'm a huge listener of radio. Sometimes it's my only entertainment while in a vehicle on long nights. Recently, I became aware that there was a local radio station, The spy Fm, that lost their channel due to a big radio station took over their frequency. From what I can tell, whomever has the most money and biggest lawyers, gets every bit of airspace, in every local area. The Spy FM was doing a great service to our city by providing a diverse selection of radio entertainment in OKC. The other stations are simply stifling diversity. Can we please fix this problem? What can we do about this serious problem? Will you even respond to my request?

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Judith Brink

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

I have personally seen the positive benefits of local non-commercial radio in California, Oregon and now Washington the past 37 years. For four decades I have volunteered my time to train folks, young and old in broadcasting areas such as live radio theatre, news production and engineering.

When the listeners to local non-commercial broadcasters become volunteers the result is a better informed community thanks to more diverse views being broadcast.

At a time when just a few corporation own multiple commercial licenses in towns across America, now more than ever the FCC needs to follow through and maintain channels allocation for local, non-profit, non-commercial radio.

Thank you,

Franklin Ruetz

Dear Honorable Congress person and FCC Commissioners,

As you probably know last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This important law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

I sincerely believe that community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies.

Please therefore tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Kevin Kuehlwein

Honorable Congress person and FCC Commissioners,

I have a long-standing interest in radio as a creative and community medium. I taught "Radio Studies" at Emerson College in 2009, with a focus on community radio. As we have just witnessed with Hurricane Irene, local community-based radio (both non-profit and commercial) is essential for community information and civil defense. And on a day-to-day level it can a great boost for community pride. We have some of the best radio in the country in Boston. However, many small towns in the U.S. are completely without any local radio and commercially-run stations with local staffs are not viable in these locations.

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

Yukon, OK 73099

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

George Hooper
1000 S. Cornwell Dr. #605

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Sharon Stringer
115 Monroe Ave.
State College, PA 16801

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

****PLEASE SAVE OUR COMMUNITY RADIO STATIONS!**

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

My mother produces a weekly show that airs on a community channel about local events and interviews, and this is a mainstay of her life. Community radio is one of the last places left for low-income people of all ages to get their voices broadcast and produced. Please do all you can to save this American tradition!!

Sincerely, Dr. Megan Boler

Honorable Congress person and FCC Commissioners,

In my area we are fortunate to have some truly local community radio. In this era of media consolidation and a reduction in the diversity of on air opinions, I feel it is critical that channels are reserved for truly local inclusive programming.

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. Honorable leaders,

I know you have much bigger fish to fry so I appreciate your attention. I have been following Low Power Radio since 2000 when I read an article in THE AUSTIN CHRONICLE about it. 7 years later I completed my masters report in the department of Radio Television and Film (RTF) at The University of Texas on Low Power Radio, localism and community feedback.

<http://www.lp-fm.org/site/node/2>

Throw out translator applications from parties looking to extend current signals. These are not new voices. New voices can come from small cities that don't have newspapers where when someone dies all you can do is put up a sign about the wake at the gas station and hope everyone sees it. New voices can come from large cities, such as in Austin, Texas. I asked the broadcast and content manager of KUT and one of the morning DJs how to put the "R" back into "RTF". Neither of them knew how! Why extend their signal to the borders of Texas? They tell recent grads someone has to die before a position opens up. This isn't innovative, creative or an accessible media entity for the public. I will be meeting with the Texas Association of Broadcasters soon about local programming ideas.

Thanks for your attention and contact me with any more questions!

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely, The Legendary Jim Parks www.downdirtyword.blogspot.com

Hannibal, MO 63401

Honorable Congress person,

Radio has had an important role in the history of Texas, especially in the early years of transmitted voice and music.

Recently, Congress passed the Local Community Radio Act, that will expand the number of FM channels available for low power stations -- radio stations that are designed and aimed at serving their local communities.

However, the FCC is considering using some of this bandwidth to "repeat" or expand the strength of existing large-scale radio stations. Not only does this violate the intention of Congress' mandate, but it expands the reach of mega-stations and minimizes the potential for local information to be distributed in a timely and effective way during important times -- weather emergencies, political elections, school years -- heck, even local sporting events and church schedules.

Please stand firm in your decision as Congress and require the FCC to preserve channels for low power community radio in Texas.

Sincerely,

Cathy Brigham, Ph.D.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture - but now that Cumulus Broadcasting has announced its decision to pull the plug on WTCY, 95.3 FM the Touch in Harrisburg - leaving the Harrisburg community with no urban station (or local on-air community resource) - keeping the door open for additional community stations is more important than ever. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Randy Gross

If you have time, please notice the incredible difference KRBX 89.9 FM Caldwell/Boise has already made in the Treasure Valley community. Community Radio is viable, real, and a treasure to the people here. Thank you for supporting this opportunity across the state of Idaho and in other areas of the country. It is an indispensable resource as vital as a public library or park.

With sincere regard,

Elizabeth Orcutt

Below is the form letter and I would like to add the following comments: Community radio is important for the obvious reasons but also because it represents part of the available public media and media. The more types of *different* stations, channels, newspapers there are, the better the media serves society. These community stations also serve as teaching platforms for young kids.

Thanks, Mona Leila Mays

Spokane Valley, WA 99206

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Alison Buehler
1342 Lake Valley Dr
Starkville, MS 39759

Honorable Congress person and FCC Commissioners,
I worked in college radio years ago at Georgetown University. When the Jesuits learned about its women's programming and advertisements for the Free Clinic, they sold the station. So I learned early that local community radio is powerful. It's responsive. And it's important who controls it. The air waves belong to all of us -- that is a foundational premise of the FCC and of public radio. But now even "public" radio has become corporate. NPR wants repeaters so it can broadcast its national programming everywhere. But national programming must not drown out local voices. There is more to public radio than NPR. Did you know that when we lost a satellite a few years ago, many communities lost their connection to NPR programming, and instead relied on real community radio? PLEASE KEEP DIVERSITY IN RADIO! It keeps this nation vibrant; it's a local voice in an emergency, and it offers important training opportunities to young people. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,
Constance McKenna
17124 Briardale Rd
Derwood, MD 20855-2075

Honorable Congress person and FCC Commissioners,

Here in Vermont we just suffered through the hurricane. Information about weather and real time conditions were very lacking as it was a Sunday with many forecasters off for the weekend and the command center for the state flooded. I got my detailed info from calling a series of friends but local radio would have been an excellent clearing house. Ham radio operators used to serve this function but as many learned their emergency response skills for world war two then have mostly died off.

Honorable Congress person and FCC Commissioners,

As media ownership becomes more expensive and consolidated into fewer hands, essential local news and information issues are not being covered and public voices are not being heard. Community Radio is now the town hall for our democracy. The few remaining channels should be dedicated for the public's use via their ownership in public trust -- to communities in all their diverse splendor.

Honorable Congress person and FCC Commissioners,

We live in a rural county of 4,200 square miles with NO local FM radio station. Community radio is the only method to ensure the possibility of proper notification of emergency, news, and weather information for the 13,000 people who resided in Sierra County, New Mexico.

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,
Bradley Grower

Hopefully you are well aware of the need for local radio programming. Right? The rural areas, like mine which is adjacent to the Bonneville Dam, Washington State, desperately need local programming particularly for emergencies. Example: 12 years ago a gas-line broke near the HotSprings Lodge in North Bonneville, WA. There was no information to be found anywhere on the wall of fire we could see from our nearby Stevenson home. It was ground to 100's of feet in the air. Of course, we began preparing for evacuation. But, idiotically, if there had been a local radio station in Stevenson (county seat of Skamania County) we would have known what it was and the dangers or lack of it posed. Local radio is a viable, needed service. Support any and all legalities that will get it done.

Sincerely,

Judith Nappe

Fairfax Station, VA 22039

Honorable Congress person and FCC Commissioners,

In the previous session, Congress wisely passed the bipartisan Local Community Radio Act, the culmination of a ten year long and well vetted campaign. A group of community stakeholders: a coalition of grassroots organizations, churches, schools, and non-profit organizations was behind this review and this legislation. This people empowering law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are adequate channels available for new and local low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations. So, on July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Since the first radio broadcasts, community based radio has been a vital resource for celebrating local culture, sharing timely and local information, and communicating during local, regional, state and even national emergencies. Please direct the peoples FCC to set rules that preserve sufficient channels for low power community radio in our districts and state.

Sincerely,

Joseph & Donna Bridy

Carmichael, CA 95608-3340

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Aaron Gayken
310 W. 21st St. #9
Sioux Falls, SD 57105

Honorable Congress person and FCC Commissioners,

Please vote to reserve channels for local community radio. Our communities in Arkansas deserve these channels to have a voice in their government and to showcase local art and entertainment. This need increases with every consolidation of the print and electronic media, that are controlled by faceless corporations.

Thank you for your consideration.

Sincerely,

Rita Ferreira
1502 Alice St
Oakland, CA 94612

Honorable Congress person and FCC Commissioners,

It is a mystery to me why the public airwaves are not used more for the public. For example, why cannot our candidates for public office use the public airwaves in furtherance of our nations civics necessities? This way, candidates would not need to pay for airtime, rendering them in hoc to donors. we need community radio for many purposes.

Passage of the Local Community Radio Act was the result of a ten year campaign led by diverse organizations, churches, schools, and non-profit organizations. Now the FCC has a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators. The public wants it's airwaves to work for civic good, not corporate profits.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state. And by the way, more of the spectrum should be devoted to serving the needs of its owners: the citizens of this country, who are poor and still paying taxes - unlike the rich.

Sincerely,

margaret draper

ruskin, FL 33570

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

John Timpe

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

I am adding to this otherwise pre-written message to say that between 2000 and June 2011, I was a disc jockey on radio station WRVU, based at Vanderbilt University. This was a non-profit station which played a wide variety of music and had some news and talk programs as well. Against the wishes of its student staff, it is in the process of being sold by Vanderbilt Student Communications, a corporation semi-independent of Vanderbilt that simply wanted more money for its other operations, to Nashville Public Radio. Nashville Public Radio is already using the frequency for an all-classical station.

I do not begrudge Nashville Public Radio's wish to have an all-classical station, but by purchasing WRVU they are eliminating a non-profit station which appealed to, entertained and informed many Middle Tennessee residents who are not especially interested in classical music. WRVU's offerings were almost completely unduplicated by Nashville's commercial stations. If low power community radio is given priority over translators, then perhaps a replacement for WRVU can arise. (We do currently have a low-power station in the area--WRFN (Radio Free Nashville)--but it is based in Pasquo and can't be heard in most of Nashville proper.) I believe that a low-power community station similar to WRVU would be a much greater boon to the area than one more translator station would be.

Sincerely,

Pete Wilson

This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Mitch Ritter (Terminated by Wells Fargo Card Services
after 11 highly commended years, immediately upon approval of Wachovia acquisition with
TARP capital reserve support and
approval by U.S. Treasury)

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Martin Eder

The Honorable Lloyd Doggett, 25th District, Texas
The Honorable John Cornyn, US Senator, Texas
The Honorable Kay Bailey Hutchison, US Senator, Texas

Ms. Marlene H. Dortch, Secretary
Federal Communications Commission
445 12th Street, SW
Washington, D.C. 20554
September 1, 2011
Re: MM Docket No. 99-25
Reserving Central Texas FM Channels for LPFM Use

Ms. Dortch,
Austin Airwaves was just one of thousands of organizations nationwide that worked diligently for more than a decade to pass the Local Community Radio Act ("LCRA"). We worked until the final days of the 2010 Congress to overcome the last of the holds in the Senate. Once the final hold was lifted, the Bill passed the Senate on December 20, 2010 and President Obama signed the LCRA into law on January 7, 2011.

We are asking the Commission to assure the citizens of Central Texas that there will indeed be channels available for use as locally-programmed, locally-operated LPFM stations, specifically for the cities of:

AUSTIN, LaGRANGE, COLUMBUS, ELLINGER, MANOR, MANCHACA, LAKEWAY, BEE CAVE, VOLENTE, BASTROP, BURNET, TAYLOR, KILLEEN, SMITHVILLE, BRYAN-COLLEGE STATION and NAMELESS, TEXAS.

While there are a few non-commercial, educational stations that serve some parts of the larger cities listed, many of the smaller rural communities have no locally-originating radio programming whatsoever. This represents a serious and continuing public safety issue for many of these communities, especially the most rural, economically-challenged and isolated.

From firsthand knowledge, we know that many of these communities face continuing public safety threats from tornadoes, wild fires, landslides and flooding. Central Texas is especially prone to both exceptional drought and extreme flooding.

By way of example, on September 9th, 2005, the Mass Media Bureau, Audio Division issued Austin Airwaves an experimental LPFM License KH5X-IM (See: Section 73.1201) for the Katrina Aftermath Media Project station KAMP 95.3 FM. This station broadcast emergency information to the 25,000 evacuees inside the Houston AstroDome following the Hurricane Katrina disaster along the US Gulf Coast. That station has served as a model of appropriate and efficient use of the FM spectrum in response to local communities during and following natural disasters.

Austin Airwaves is aware that the FCC must first clear out a significant backlog of thousands of pending applications for FM translators before they can be made available

for local LPFM use. We strongly support the Commission's move towards requiring that low power stations be both locally-originating and locally-operated. As it stands now, many thousands of these translators are being inappropriately used as an informal network for a number of national broadcasting organizations. Most provided little or no local content, not even during local emergencies, and virtually none are locally-operated, with no offices, studios or staff.

Responding to the new regulatory mandate of the LCRA, the FCC is required to ensure that FM spectrum is available for local low power radio use. It is our understanding that the Commission will have to dismiss a great many of these pending translator applications in order to comply with the new law.

Austin Airwaves strongly supports the Commission's consideration to DISMISS any and all pending FM translator applications that will hinder locally originating LPFMs from gaining new licenses.

Thank you for your time and consideration on this matter, I remain, cordially yours,

/s/ ____email____ August 29, 2011

Lansing, MI 48917-1773

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Michael Watson
2305 Liberty Church Road
Hickory, NC 28601-7150

Honorable Congress person and FCC Commissioners,

From Local govt. meetings to the KDFC Classical Music Station to local college stations (Like UC Berkeley and USF) as well as local jazz and stations like NPR and Pacifica Radio-- all need access to low power FM (LPFM) radio channels . Corporations do not own the airwaves!

They are for profit and edge community radio out!

And incidentally, we are still trying to save our community station, KUSF, from it's sale to USC in southern CA. Our voices need to remain in San Francisco as do all the voices in each and every one of our communities.

Thank you for your time.

Sincerely,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Mishka Repaska
